

D2104V to D2118V

IP VIDEO DOOR STATION

For houses and buildings, 4 to 18 call buttons

ADVANTAGES

HOW DOES IT WORK?

Imagine, you are not at home and your children have locked themselves out or the courier wants to deliver a parcel. With DoorBird this is no longer a problem. Every time someone rings the doorbell you will get a push notification on your smartphone or tablet. Via the DoorBird App you are not only able to talk to the visitor but also see them live in HD quality. You will never miss a visitor again. With DoorBird you are on the move and yet at home, even if a burglar rings at the door to check if someone is at home.

SMART HOME STARTS AT THE FRONT DOOR

DoorBird is the smart solution for your house entrance. Simply connect your DoorBird IP Video Door Station to your smartphone and talk to your visitor – anywhere you are. The IP Video Door Station can be used as a standalone unit or can be integrated into an existing Smart Home platform. Even existing classic installations such as a door chime or an electric door opener can still be used and controlled via the DoorBird App.

QUALITY MADE IN GERMANY

All DoorBird products are designed, developed and produced by Bird Home Automation GmbH in Berlin, Germany. We manufacture all products with the greatest care and precision, and deliver them to our customers all over the world.

Open API

 Local interface for integration with third-party systems and SIP

Video and audio call

 On smartphones, tablets (iOS, Android), IP and landline phones (SIP)

Smart Transmission Mode (STM)

 Real-time audio / video communication, optimized for mobile devices via WiFi, 3G, 4G, 5G

Smart Home & NVR compatible

 Control4, Loxone, Crestron, Synology, AVM FRITZ!Fon, URC, QNAP, RTI, ELAN, Fibaro, Bang & Olufsen and others

Automatic door buzzer

 For use in medical offices and office environments

 Ultra wide-angle, hemispheric lens, 180°

Motion sensor with 4D technology

 Distance up to 10 m adjustable via App (interval: 1 m)

Free visitor history

 Store still images for free, optional video recording available

Light sensor

· For night vision mode

Call button

- · With backlit nameplate
- \cdot Up to eighteen call buttons

Individual action schedules, e.g.:

- RFID card "abc" has only access on Wednesday from 9 am until 11 am
- 4D motion sensor switches on external lamp between 9 pm and 6 am

Microphone

· Clear voice transmission

Easy connection to the network

 Connection via a network cable or a bell wire (with a 2-wire transformer) to a RJ45 socket (PoE, network data)

Geofencing

Automatic door and gate opening when returning home

Noise reduction and echo cancellation (AEC, ANR)

Two freely configurable bi-stable switching relays

- Two doors or gates can be controlled via App
- Status configurable via App: temporary or permanent circuit

IR Night vision

· With 12 Infrared LEDs

RFID card reader

 Configurable remotely via App (e. g. time frame)

TECHNICAL SPECIFICATIONS
